Day or night, LED videowalls astonish!

Forget the old Jumbotron, our screens are beautiful! Thrill audiences and sponsors – even when budgets, spaces and time frames are tight!

Video RoadShowssm have the footprint, on-board power, and Barco D7 screens that make them perfect for sports, fairs, shows, and rallies. For large events rent more than one so everyone gets a great seat at the concert, race or festival.

Video Roadshowsm is a total service, not just a rental. One technician handles the entire job. ROI on marketing and advertising is maxed when delivery and power are included. And with a 20 minute set or strike you can use it in several places every day. Call 240-599-2408

Big Screen Excitement Anywhere You Want It, Any Time You Want! - Nothing Delivers Impressions Like A Video Roadshow

Can Video Roadshowsm be seen in bright daylight?

Yes! Our Barco D7 technology delivers 5,000 nits and can be viewed in direct sunlight.

Can I use Video Roadshowsm indoors?

Yes! At 19.5'L x 8'W, including hitch, the Video Roadshow'ssm small footprint is perfect for indoor use. It is less than 8'H, passing easily below any commercial garage door. Easy tie-in to house power, and stabilizers that do not reach outside the trailer footprint, allow Video Roadshowsm to be used in trade show booths, as I-MAG screens or for digital signage applications.

What types of video content does Video Roadshowsm accept?

Our standard electronics package accepts all analog (NTSC or PAL) and SDI video sources and includes a DVD/VHS player, a computer scan converter and a switcher.

Will a Video Roadshowsm handle my content or source?

Yes! Every Video Roadshowsm is equipped with a computer scan converter and a DVD / VHS player. Virtually any analog or digital format can be accommodated with advance notice.

I need help creating video content. Can Video Roadshowsm help me with creative production?

Yes! Our Creative Department can reproduce a complete video or repurpose your existing media. We have a complete Production Suite. As part of CPR MultiMedia Solutions, Video Roadshowsm are supported by one of the country's premier audio, video and lighting staging companies.

How big are Video Roadshowsm? How much does it weigh?

Video Roadshowsm take less than a 20' x 8' footprint with stabilizers deployed. At less than 10,000 pounds it can be placed even on upper floors of convention centers.

What happens if it rains? Do Video Roadshowsm tolerate weather?

Yes! Waterproof IP-65 ratings mean the Video Roadshowsm will be running even if your audience is running for cover!

Can I lease Video Roadshowsm for a series of events, such as once a month, etc?

Yes! Call us to discuss long-term, multi-screen and multi-event contracts - you'll be surprised at how affordable state of the art technology can be!

I want to put Video Roadshowsm in different places during my event. Can I do that?

Yes! With 30 minute set and strike times you can use the Video Roadshowsm in multiple places in one day.
